

LC LISC

Classification Systems

LIS collections are classified following to Library of Congress Classification Scheme to support the new kind of science which will emerge in the future. Also LIS has our own classification systems to classify specific collections.

LISCAT

Library Online Catalog

LIS has implemented Horizon Sunrise Library Automation Systems as well as iPac as online public access catalog (OPAC). LISCAT also support Z39.50 protocol which let users can retrieve library catalog from any library around the world.

LIS INTELLIGENCE

Library Automation

The first **Radio Frequency Identification (RFID)** library management system of Thailand has been fully implemented in LIS called LIS Intelligence.

It primarily automates the book handling processes including antitheft allowance, inventory maintenance and self circulation processes.
